Remarks

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections – 35 U.S.C. 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 1, line 3, "predefined rules" is vague and indefinite because it is not understood what rule they are. Line 7, "the comparing" lacks antecedent basis and is vague whether it is referred to the result of the comparison and the comparing process.

In Claim 4, line 1, "the lifetime" lacks antecedent basis.

Claim Rejections – 35 U.S.C. 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

Art Unit: 2163

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Gupta et al. (US 2002/0075805).

Regarding Claim 1, Gupta discloses a method of flow control in a packet switch, comprising the steps of:

- classifying an incoming packet (0233-0235, 0340) according to its priority (paragraphs 0258-0263, 0274-0276, 0283-0287, 0290, 0295, 0296) based on predefined rules to produce a lifetime value associated with the packet;
- sending the packet and associated lifetime value to a queue (See paragraphs 0090, 0253, 0270, 0275);
- periodically changing the lifetime value (X, for each token bucket) and comparing the changed value (variable X) to a threshold value (the length of the packet) (See paragraphs 0251, 0269); and
- removing the packet from the queue based on the comparing (paragraph 0253).

Regarding Claim 2, Gupta discloses the steps of:

- determining a weight value (quantum or weight) based on the priority of the packet;
- determining a queue occupancy (available capacity) in a queue (J) to which the packet is assigned;

- producing the lifetime value based on the weight value and the queue occupancy (paragraphs 0287-0290); and
- discarding the packet if its associated lifetime value (X) is below the threshold value (length of the packet) (See paragraph 0251).

Regarding Claim 3, Gupta discloses that the discarding of the packet occurs before sending the packet and associated lifetime value to the queue (paragraphs 235, 0251, 0268, 0289, 0294, Figures 26, 28, 30, 31).

Regarding Claim 4, Gupta discloses that the lifetime is periodically decremented and the packet is removed (dropped) from the queue when reaching the threshold value (paragraphs 0251, 0262).
